

Magnets Checklist

- A bar magnet has a magnetic field around it. You should be able to draw the field around a bar magnet.
- Magnets have north and south poles.
- Two north poles will repel each other
- Two south poles will repel each other
- A north and a south pole will attract each other.
- You need to be able to draw the field around two bar magnets attracting and two bar magnets repelling.
- The earth has a magnetic field around it. It has a shape similar to that of an enormous bar magnet.
- You should be able to describe how to make a magnet and hence a compass.
